- **Frameworks: Django, MERN Stack (MongoDB, Express.js, React, Node.js)**
- **Frontend: React.js, Tailwind CSS, HTML5, CSS3**
- **Backend: Node.js, Express.js, Django**
- **Testing & Automation: Robot Framework, Selenium**
- **Other Tools: Git, GitHub**
- **Critical Thinking, Creative Problem-Solving**

LANGUAGES

- English (Intermediate Proficiency)
- Tagalog (Native Fluency)

PROFILE

Passionate Web Developer with experience in building full-stack applications using modern technologies such as React, Django, and the MERN stack. Adept at creating user-friendly websites, managing databases, and implementing automation testing. Committed to delivering clean, efficient code and continuously improving both technical and creative skills.

PROJECTS

EcoSort: Automatic Waste Segragator

A hardware/software system that detects and segregates trash using capacitive, inductive, and load cell sensors. The accompanying web application monitors bin levels across different locations. Built using React, TypeScript, TailwindCSS, and Firebase for the database, with Arduino C++ code for hardware integration.

Inventory Management System
Python Django Framework

A Django-based web application that allows administrators to manage inventory items, including adding, updating, viewing, and deleting products with quantity tracking. Designed for internal admin use to streamline inventory operations.

Bulsu PIPS
University Project Management System

A university project management system that tracks ongoing projects, funding requirements, and project statuses, including projects awaiting approval. The system provides a centralized platform for monitoring and planning university initiatives.
